CASH DEPOSITORY KIOSKS

Envelope Option

This option is used while depositing cash in bulk. The stacked envelope is used to deposit the money and the envelope is then dropped into KIOSKS like in an ATM. The whole process is video recorded from the moment the “Envelope” option is chosen.

The software can give daily reports on the cash deposits and all the envelope transactions. This also has an additional feature where customers can use their credit / debit cards to logon to their account.
