These KIOSKS come in two models –
Stand alone with back end connectivity to server,
Wall mounted with back end connectivity.

CDS 1500:- This model comes with MICR reader, 15" Touch screen monitor and Thermal printer. A Cheque deposit can be made; receipt can be issued with date, time & cheque number and also the bank details from where the cheque is drawn.

CDS1501:- This model comes with a built in scanner, touch screen monitor and thermal printer. In this model the image of the cheque is scanned and a receipt is issued with date, time and details of account.

CDS 1502:- This Kiosk also contains a Card reader with scanner and thermal printer. Here one can insert the card and deposit the cheque without manually entering any data. This also has endorsement on the back side of the cheque.

The **unique features** of our KIOSKS are revenue collection is made easy. It can also be used as **COLLECTION KIOSKS** for credit card payments, Insurance premiums or loans. **Daily / Monthly reports** can be generated as per the number of DD / cheque transactions. This also has an additional feature, customers can use their credit / debit card to pay their bills.
